

Intelligent Parker Amplifier

Ethernet Servo Drive/Controller

IPA: Versatile Motion Capabilities

The new Intelligent Parker Amplifier or IPA, is a 1.5 axis servo drive/controller based on the ACR control platform. Available in two power levels, 400W and 1500W, the IPA can drive a wide range of rotary and linear motors and supports a number of industry standard feedback protocols.

The IPA provides a dual port Ethernet interface which gives the machine builder the flexibility needed to create cost effective motion control solutions. The IPA operates as a fully programmable stand-alone motion controller with on-board I/O and virtual axis capability or can be integrated into a PLC or PC-based machine control solution. Software tools are included to optimize motion performance and efficiently monitor and manage the application.

Specifications

Part Number	IPA04-xC	IPA15-xC
Rated Motor Power	400 W	1500 W
Peak Motor Power	1200 W	4500 W
Continuous Current	3	6.3
Peak Current	9	18.9
Motor Input Voltage	100-240 VAC Single Phase or 20-90VDC	
Control Input Voltage	100-240 VAC Single Phase	
Logic Keep Alive	24 VDC (optional)	
Servo Update	62.5 µs	
Digital Inputs	7 programmable inputs, 5-24 VDC (3 high-speed 1us capture, 4 standard)	
Digital Outputs	4 programmable outputs, 5-24 VDC	
Analog Inputs	2 @ 12-bit resolution	
Power Stage Enable	2 redundant inputs for torque disable	
Primary Encoder	Incremental encoder, EnDat 2.2 absolute encoder*, BiSS-C*, 1Vpp SineCosine, DSL* (*HC version required)	
Secondary Encoder Input	Incremental encoder, 1.6 MHz, differential, A, B signals	
Communications	100 Base-T, Dual RJ-45 connectors, Supports TCP/UDP and EtherNet/IP	
Development Software	Parker Motion Manager	
API	Libraries for C++,C#, VB.Net, etc	
Programming Language	AcroBASIC with 1Mb of user memory	
Standards	UL Recognized 508c, CE (LVD), CE (EMC), RoHS EtherNet/IP Conformance Tested	
Environmental	0-45 C , 0-95% Humidity

IPA Servo Drive/Controller

Motion

The IPA is built on the proven and powerful AcroBASIC programming language used in the Parker ACR family of motion controllers. Project development is managed with the ACR-View development software that provides the user with the tools to program, commission, tune and debug applications. Motion and machine control features include:

- **Multitasking of up to 16 different tasks**
- **Incremental, absolute and continuous moves**
- **Trapezoidal and S-Curves profiles**
- **High speed (1 ms) position captures**
- **Registration moves**
- **Electronic gearing and camming**

Visualization

Combined with Parker’s Interact Xpress HMI platform the IPA becomes an affordable machine solution. Xpress supports connections to multiple IPA and other PLCs at the same time, with an easy to use development environment and award winning graphics.

User Interface

Part Number	Description
XTA-007-3R2-33	7" WVGA Display with Interact Xpress pre-installed
XTA-010-3R2-33	10" WXGA Display with Interact Xpress pre-installed
XTA-015-3R2-33	15" FWXGA Display with Interact Xpress pre-installed

Communications

EtherNet/IP gives IPA users a popular connectivity option to PLCs for easy integration of servo motion in larger machine control application.

The IPA is an EtherNet/IP adapter device supporting both I/O and

Explicit Messaging. Add-On Instructions are available for seamless integration with Logix controllers.

Users can also take full advantage of the IPA programming language and to create complex, custom routines called by the PLC.

EtherNet/IP™

Add-On Instructions include:

- **Homing**
- **Servo on/off**
- **Absolute/relative moves**
- **Jogging**
- **Run program**
- **Fault reset**
- **Gearing**

Performance

At the core of the IPA is outstanding servo performance for the most demanding applications. The IPA can be paired with wide range of Parker rotary and linear servo motors, utilizing cost effective incremental encoders or absolute feedback devices based on high speed serial protocols. Recommend motors include:

- P-Series Rotary motors with BiSS-C absolute encoders
- MPW stainless steel motors
- BE Series high torque servo motors
- SM slotless servos
- MPP and MPJ industrial motors
- P-Series Direct Drive motors
- Linear motors and actuators
